

USING THE AUDIO-VISUAL EQUIPMENT

PLEASE READ THROUGH THESE INSTRUCTIONS CAREFULLY BEFORE YOU BEGIN

To use the PC or for Internet access you will need a Birkbeck IT Services or Eduroam log in - ask the AV Team

EXTRON TOUCH PANEL

The panel in this room may not look exactly as shown here but all the essential functions will be available

If the room is fitted with a data projector it will now activate and the ON button will continue to flash until the projector has finished warming up. **Please be patient - this process can up to a minute to complete.**

Alternatively, if the room is fitted with a professional display the screen will turn on almost immediately.

The *projector* or *display* will now be ready to present whichever function you select from the input panel (shown below).

After connecting or logging on you can switch between sources as often as you wish during your presentation.

PC

The PC is located in the cabinet
Make sure it is ON before continuing
Log in with your user name and password

USB-C

Connect the provided USB-C cable into the device and ensure the device is powered on.

HDMI

Connect the provided HDMI cable into the device and ensure the device is powered on.

Control Camera

Camera controls for lecture capture.

BYOD

Connect the device using the on screen

Blank

Mute the image on the projection/display

Blu-Ray

Make sure the BLU-RAY Player is ON
INSERT THE BLU-RAY OR DVD
Then use the controls on the touch screen to operate the functions for playback.

Volume/Mute

Controls for the audio and mute function

At the end of your session: **System Off**

Shuts down the data projector and raises the screen. *Or will turn off the professional display (where it is available).*
